-

Project Summary :

1. Project : Tagrain

Title : IvendRetail
Role : Automation Test Engineer
Team Size : 10

Description:

Tagrain's goal is to streamline daily transactions and maximize profits of small retail businesses globally through the cloud-based point-of-sale system. The company features tools that drive customer acquisition, increase average order size, and make the dream of long-lasting, loyal customer relationships a reality.

Responsibilities:

- Functional testing, Exploratory testing, smoke testing etc.
- writing code to automate the test cases using Playwright with JavaScript .
- Automated core POS features using Playwright with JavaScript, covering product search, billing, customer creation, and payment validation. Implemented parallel test execution in Playwright to reduce execution time of large regression suites. Performed Git-based code commits and collaborated with team members through pull requests.

2. Project : SAFE HEALTH

Role : Automation Test Engineer

Team size : 10

Description:

Our mission is to increase accessibility and reduce the cost of low acuity care at population scale. We are inspired to create tools that help people to play a more active role in their personal healthcare and empower the private sector and world governments with technology that makes healthcare more accessible and reduces the cost of routine care at population scale.

Responsibilities-

- functional Testing for multiple module and page's. Built robust Selenium + Java automation scripts for multiple health-care workflow pages. Used Git for version management of automation code and ensured smooth updates during sprint releases.
- Write code to automate the testcases using selenium and Java.

2. Project : WSI

Role : Automation QA

Team Size : 4

Description: Williams-Sonoma, Inc. is a multi-channel specialty retailer of high quality products for the home. In 1956, our founder, Chuck Williams, turned a passion for cooking and eating with friends into a small business with a big idea. He opened a store in Sonoma, California, to sell the French cookware that intrigued him while visiting Europe but that could not be found in America. Chuck's business, which set a standard for customer service, took off and helped fuel a revolution in American cooking and entertaining that continues.

Participated in Git operations like branching, merging and reviewing automation code.

Responsibilities:

- Writing code to automate the test cases using Cypress with Javascript .Developed automation scripts using Cypress with JavaScript to validate UI components, navigation, and cart workflows.
- Done REST API Testing ,Smoke ,regression, functional Testing etc.

4. Project : Safeway

Role : Tester

Team Size : 4

Description:

Safeway operates as a banner of Albertsons Companies, one of the largest food and drug retailers in the United States. With both a strong local presence and national scale, the company operates stores across 35 states and the District of Columbia under 20 well-known banners. Albertsons Companies is committed to helping people across the country live better lives by making a meaningful difference, neighbourhood by neighbourhood.

Responsibilities :

- Writing test cases ,Accessibility Testing ,Automation using Selenium and Java.Managed automation code versions using Git and maintained structured commit history
- Worked on Postman.Designed automation test scripts using Selenium WebDriver + Java for Retail modules such as checkout, product listing, and user authentication.
